Everlasting Innovation:Continuous product and formula innovation to create innovative dosage forms as well as products

Cost Competitiveness:Continuous strategic collaboration with global major raw materials suppliers, along with efficient production management to achieve cost competitiveness.

Company History

IVC Global Locations & Facilities

IVC Services

Product Development

We provide professional CDMO services according to the intended product functions and targeted consumers as well as different lifestyles. Our product solutions will combine up-to-date market trends and our insights so that our customers will stay competitive.

Global Supply Chain Management

With our global supply chain network of product development and manufacturing, IVC is more capable of providing one-stop CDMO services for global customers who seek localized expertise and support for successful product development and execution.

Fast to Market

Fast to Market, speedy products launch vehicle, aiming to help our customers with their product launch in a timely and rapid manner. We can provide market ready solutions leveraging our 10,000 in-house formulas.

Blue Hat (Domestic and Import) Notification & Registration

We've been providing "Blue Hat" registration/notification services to our customers for nearly one decade. We possess 200+ Blue Hat licenses covering all VMS and major functional claims as per relevant China health product regulations. Leveraging our expertise and experience in domestic "Blue Hat" product development, we are able to provide imported health food "Blue Hat" registration/notification services.

IVC Advantages

From Mass to Niche

We provide a variety of product solutions for mass market such as Vitamins, Heart and Brain Health, General Health, Bone Health, Joint Health, etc. With the rising consumer awareness on a variety of emerging health benefits after COVID-19, we've been developing product pipelines for Mental Health, Stress Relief, Women's Health, Cognition Improvement, Digestive Health, etc.

Global Market Insight - "IVC Analysis"

We are delighted to keep our customers on the same page of the latest industry and market trends. We take pride in providing "IVC analysis" knowledge and insight to our customers leveraging our worldwide industry and market database.

Innovation and R&D

We take a holistic approach towards innovation. We are capable of developing innovative dosage forms using our in-house R&D incubator. From ingredient selecting, formulation development, sensory study to final product stability study, we adopt an integrated product development (IPD) system and provide a one stop service to our clients.

Client Success Support

From market insight to product commercialization, we work closely with our clients to help them gain an in-depth understanding of product knowledge. We support our clients with complete tools of marketing literatures as well as product trainings both live or virtual.

IVC Quality

Quality has always been and always will be the key to our success. IVC deeply believes in **Quality supplements through quality manufacturing.**

Global Quality Vision and Practice

We are a global network of multiple cGMP compliant manufacturing facilities. Our regular networking and communication ensures we have a better understanding of regulatory frameworks and requirements across different end markets. We provide regulatory expertise to our customers worldwide.

Global Quality Compliance

IVC global facilities are designed and equipped with the latest state-of-the-art manufacturing equipment and machineries. Our manufacturing process is conducted in strict compliance with cGMP requirements of global major markets including USA, China, EU, Canada, Australia, etc.

Full-service Lab

Across all of our sites and at our in-house full service Labs, our highly tenured team follows proven SOPs and conducts rigorous and frequent tests on raw materials, finished products and packaging. Our own full-service lab in JingJiang, China is accredited by China National Accreditation Service (CNAS) for conformity assessment.

GMP Registered

IVC Dosage Forms

Tablet

Tablets are one of the most common application modes in the global nutritional supplement sectors. As the world's leading tablet solution provider, IVC regularly handles all types of tablets including Color-coated Tablets, Sublingual Tablets, Micro-effervescent Tablets, Time Release Tablets, Effervescent Tablets, Chewable Tablets, etc.

Hard capsule

With a diverse portfolio, we offer a wide range of capsule material, designs, sizes and colors to best fit the characteristics of nutritional ingredients, the optimum delivery to the body and lifestyle, cultural and dietary preferences of consumers.

Softgel

Softgels as supplementation dosage form can be widely used in Vitamins and Minerals, Plant Extracts, Cardiovascular Health, Vision Health and other areas. IVC is also capable of developing and manufacturing chewable flavored Softgel (chewable Burstlet) and own patent vegetarian softgel (iVgel™)

Probiotics

Probiotics have high market recognition and are widely used in the fields of Intestinal Health, Oral Health, and Female Personal Care. IVC has an independent probiotic production workshop with advanced production process, ensuring the stability of live bacteria during the production process.

Gummy

Vitamin gummy is one of three top-selling dietary supplement dosage forms in the U.S. And Melatonin Gummy, Apple Cider Vinegar Gummy, Multivitamin Gummy, Ashwagandha Gummy, Collagen Gummy, etc. are the trending. Gummy can also increase the compliance. If your targeting customers are children, teenager and young adults, vitamin gummy would be a good choice.

Liquid

As a popular nutrient delivery system in sport nutrition, VMS and nutricosmetic market. Liquids have a high bioavailability and become a quick and easy way for your customers to get the most out of your formulation.

Powder

High quality powder in various recipes, and you can find your perfect private label product solution with us. Powder has become more and more popular in the market because of its multiple types. Products including vitamin, protein, probiotics and other dietary supplement powder account for a large part of the market, especially protein powder. Apart from regular Protein powder, IVC is also capable of developing and manufacturing protein powder featuring low GI (low Glycemic Index).
